CULTURE

THE Culture of the Gladioli is so simple as to make it the most satisfactory of garden flowers, thriving and blooming freely with the least care and attention and making a display which for beauty of bloom and brilliancy of coloring is unequaled by any other flower. If you can grow potatoes you can grow Gladioli. Plant in any good garden soil as soon as the frost leaves the ground up to the middle of June. If several plantings are made at different times the season of bloom will be lengthened. Do not plant in the shade of trees or buildings and do not allow fresh manure to come in direct contact with the bulbs. Set the bulbs 4 to 5 inches deep, in rows, and about three to four inches between bulbs. Rows about 18 inches apart. Keep soil loose and free from weeds. When cutting flower spike let three to four leaves remain on the plant to help the bulb to mature properly. Dig bulbs in the fall any time after October 1st cut off the tops and after drying in the open air for a few days stow away in a dry, cool, but frost proof cellar, and keep as near 40 degrees as possible.

Gladioli — Evelyn Kirtland

We have been large prizewinners at the biggest shows in Canada for the last five years, including Canadian National, Hamilton, St. Thomas and St. Catharines. Anybody contemplating purchasing an exhibition collection will be sure of quality and variety by purchasing from us. All varieties listed have high rating by Chas. E. F. Gersdorff, the eminent authority on Gladioli.

We are also growers of peonies, dahlias, iris, delphiniums, tulips, etc.
and all kinds of annual flower plants. Prices on Application.

We are offering as a special, a limited quantity of our choice mixed aster seed from the field that produced the flowers that won the first prize and best display at the Canadian National Exhibition at Toronto, August, 1922.
